Introduction

Background

In this CNA Interactive Software document, we present the update of our Integrated Ship Database (ISDB) for the third quarter of calendar year 2013.

In this version of the ISDB, as in the previous ones, we bring together data on naval ships from several different online government sources into a single combined database tool. The ISDB makes ship data readily accessible for analysis and reporting. By continually maintaining and updating the database, we are better able to respond promptly to requests for information on ships from our sponsor,¹ from other CNA research scientists and analysts, and from others in government as well.

Since our initial version in 2005 [1], we have published 30 quarterly updates [2–31]. All are available online on the [Integrated Ship Database page](#) of CNA's website, www.cna.org.

Outline of this document

We begin with a brief overview of the ISDB to orient you in a general way to the database. But if you are looking for details, please refer to the original 2005 user's manual [1] and to the fourth quarter 2011 update [25]. In addition, the documentation of the second quarter 2012 update [27] discusses the changes we made due to the Military Sealift Command's (MSC) organizational realignment of 2012 [32].

-
1. This work is being conducted as part of CNA's Historic Fleet Employment Database Project, sponsored by the Deputy Chief of Naval Operations for Operations, Plans, and Strategy (N3/N5).

After the overview, we discuss our changes to the database because of modifications to the Naval Vessel Register (NVR), the MSC Ship Inventory, and the Maritime Administration's (MARAD) National Defense Reserve Fleet (NDRF) Inventory between July 1 and September 30, 2013.

Finally, we present ship counts and inventory summaries as of September 30, 2013.

ISDB overview

In this section, we present an overview of the Integrated Ship Database. We tell you where to find the database online and how to access it. Then we show how the Microsoft Excel database file is organized according to worksheet tabs for documentation, database navigation, data tables, and pivot tables for display and analysis.

Accessing the database

You can find all issues of the database on the Integrated Ship Database page on CNA's website (www.cna.org). The specific address for the main page for the database is <http://www.cna.org/centers/operations-tactics/ship-database> [33]. Figure 1 illustrates the main page.²

Figure 2 is a view of the bottom portion of the main page. It contains a list of the database products for calendar years 2012 and 2013, a link to the Database Archive, and a list of our data source organizations and respective points of contact.

Figure 3 shows the top portion of the Database Archive web page. Here you will find all our database products between September 2005 and December 2011.

2. Figures 1–3 display these web pages as of the time that this document was prepared. We update the ISDB web pages periodically, so depending on when you access the website, you may find some differences in details.

CNA Corporation's Integrated Ship Database

CNA Corporation's Integrated Ship Database contains selected information on particular ships throughout the fleet's history. The database has been compiled from authorized online U.S. Navy and U.S. government sources, including:

- The Navy's Naval Vessel Register SHIPS website
- The Military Sealift Command's Ship Inventory
- The Naval History & Heritage Command's Dictionary of American Naval Fighting Ships (DANFS) and Ship History/Command Operations Reports
- The Maritime Administration's National Defense Reserve Fleet (NDRF) Inventory Reports
- The Navy Chief of Information's United States Navy Fact File

With the database, you can see the makeup of the Navy's Battleforce. You can find where ships are in their life cycle—authorized by Congress, under construction, in commission/in service, stricken from the Register, or disposed.

For additional detail on the layout of the database and for instructions on how to use it, please refer to our [overview](#) in the December 2011 update or our original 2005 [User's Manual](#).

CNA Corporation's Integrated Ship Database was developed and is maintained by senior research scientist Greg Suess, Ph.D. (703.824.2231) and associate advisor Lynette McClain (703.824.2855). If you have any questions, please contact us. We also welcome your thoughts and suggestions on improvements in this product.

Organization of the ISDB file

The Document tab

Upon opening the database file, you will see the view in figure 4. The graphic of the document cover contains an associated hyperlink for immediate access to the documentation. Double-click the graphic and the PDF document will immediately open if you have the appropriate Adobe software installed on your computer. (If you don't, go to <http://get.adobe.com/reader/> to download the software.) The Document tab is the first of ten tabs in the file. You can see the tabs at the bottom of the sheet.

The Directory tab

Figure 5 shows the next tab in the file—the Directory tab. The Directory helps you navigate to the various tabs in the database.

DataTableOriginal

The DataTableOriginal tab contains all the data. See figure 6 for a view of the top portion of the sheet. The rows in the sheet are the records of the database, one row for each ship hull unit. The columns are the database fields.

The records

We have color-coded the records in the database to depict the various Status categories:

- | | |
|-------------------------------|---|
| • Authorized for construction |  |
| • Under construction |  |
| • Active |  |
| • Naval Reserve Force, Active |  |
| • Special, miscellaneous |  |
| • In reserve |  |
| • Leased or loaned |  |
| • Stricken |  |

The fields

Each record in the ISDB is made up of 32 fields:

- Ship Name
- Abbrev (for ship abbreviation, usually a trigraph)
- Prefix
- Hull number (with link to [NVR web page](#))
- NVR Type
- UIC (for Unit Identification Code)
- Status
- Date Status Changed
- Class (with link to [Navy Fact File](#))
- NVR Force

3. PMARS: MARAD's Property Management and Archive Record System

4. DANFS: Dictionary of American Naval Fighting Ships from the Naval History and Heritage Command (NHHHC)

- 5030.8A Force
- 5030.8A Ship Category

5. For commissioned ships, the age is the time between its delivery date and the latest date the Pivot Table was refreshed. For historical ships, the age is based on the delivery date and the decommission/OOA date. If either of these dates is unavailable, we use the commission date and/or the inactivation date, respectively.

DataTableCopy

We have protected the DataTableOriginal page to prevent unintentional data changes and maintain configuration control. With page protection, however, Microsoft Excel inhibits some features.

By copying DataTableOriginal into the blank DataTableCopy, all features are available. With this table, you can modify the contents of DataTableOriginal to suit your needs, while preserving the data table in its original form on the DataTableOriginal sheet.

The Pivot Tables

We've used Excel Pivot Tables to display the contents of the database in several different summary forms. Pivot Tables enable you to examine the contents of the database at varying levels of specificity.

BasicPivotTable

As shown in figure 7, the Basic Pivot Table presents a view of the makeup of the entire ISDB. There, you can see the distribution of the 3,190 ship records by Ship Status Group.

To demonstrate the ease and flexibility of pivot tables in Excel, we present a sequence from the fully compressed Basic Pivot Table in figure 7 to a fully expanded view of the Active Status Group in figure 10.

First, we need to filter the table to present only the Active Status Group. Figure 8 shows the drop-down menu for column A with the Active Status Group selected. Click ok.

Figure 9 then displays how to expand the compressed Active Status Group into the specific individual ship Status type, NVR Ship Type, Hull Number, and Ship Name. A right-click in the Status Group cell produces the drop-down menu with which the entire Status Group field can be expanded. Figure 10 is the top portion of the resulting expansion.

The QuikLook Pivot Tables

The QuikLook Pivot Tables present the compositions and counts of ships according to two different conventions that define Navy, MSC, and NDRF forces.

The first convention is specified in the Secretary of the Navy’s Instruction 5030.8A on *General Guidance for the Classification of Naval Vessels and Battleforce Ship Counting* [34].⁶ At the highest level, Instruction 5030.8A distinguishes between Battleforce and Non-Battleforce ships.

The second convention is that used by the Naval Vessel Register in its database field named “Force.” This convention was formerly used for Navy budgeting, planning, and programming [36]. At the highest level, ships are assigned to either the Ship Battle Forces⁷ or to the Local Defense and Miscellaneous Support Forces.

QuikLook_5030.8A Battleforce. Figure 11 shows the composition of the 5030.8A Battleforce by Ship Category, Ship Classification, and Ship Type as defined in this Instruction.

QuikLook_NVR Ship Battle Force. The makeup of the NVR Ship Battle Force is by NVR Force, Status Group, Status, and Ship Type, as shown in figure 12.

Quiklook 5030.8A Non-Battleforce. Figure 13 shows the organization of the Non-Battleforce ships according to the 5030.8A Instruction in this Pivot Table.

QuikLook_NVRLocDef&MiscSptForce. The composition of the Local Defense and Miscellaneous Support Forces of the NVR convention is displayed in figure 14.

6. In March 2014, SECNAV INSTRUCTION 5030.8A was superseded by INSTRUCTION 5030.8B [35]. In this document, we retain 5030.8A as the standard since it was in effect during the data period of interest.

7. Over the years, the term, “Battle Force,” has been defined differently and has taken different forms (as in the previous paragraph, “Battleforce”) in the various ship classification and counting schemes. To emphasize the existence of these differences and hopefully minimize ambiguity, we retain the forms used in the respective source documents cited here.

Figure 11. Composition of the 5030.8A Battleforce by ship classification and ship type as displayed in the *QuikLook_5030.8A Battleforce* Pivot Table

ShipAge Pivot Table

The final pivot table in the data file is named *ShipAge Pivot Table*. You can see the opening view of the table in figure 15. This table presents the age-of-ship data for Battleforce ships, organized using the 5030.8A ship-type groups. The ages displayed in the table are either: (1) the ages computed as of the date when the database was finalized, or (2) the ages as of the last “Refresh” of the Pivot Table.

To refresh the ship age calculation, you can right-click anywhere on the table and select “Refresh.” Or you can go to the Data tab in the menu bar and use the “Refresh All” button. Refreshing the age calculations will not account for decommissionings that may have occurred since the end of September 2013.

The pivot table shows the number of ships within each group, the average age of ships in the group, the age of the oldest ship, and the age of the newest ship delivered.

Changes in database content for this quarter

Routine update of source data

We modified the database to account for the changes in our three major data sources through the quarter. As mentioned earlier, our sources include: (1) the NVR [37], (2) MSC's Ship Inventory [38], and (3) MARAD's NDRF Inventory [39].

We obtained the data from NVR by email [40], from MSC's Ship Inventory "Show changes" web site [41], and from MARAD's monthly reports on the NDRF Inventory [42–44].

Changes in the ship forces

SECNAVINST 5030.8A Battleforce increases to 285 ships

During the third quarter of 2013, the number of ships in the Battleforce as defined in SECNAVINST 5030.8A decreased from 286 to 285 ships [45]. One ship was decommissioned: USS *Reuben James* (FFG 37), on October 1.

Figure 11 shows the composition of the Battleforce at the end of the quarter by the classification scheme in the 5030.8A Instruction.

We verified the count and the changes against the Navy Operations Center's "OPNOTES/Worldwide Navy Distribution" and "CNO's Current Ops Brief" products [45], and the Ship Management Information System (iSMIS) Manager's report on October 21, 2013 on the Total Battleforce Count [46].

NVR Ship Battle Forces at 285 ships

The composition of the Ship Battle Forces according to NVR's ship classification system as presented in ISDB's *Quiklook_NVR Ship Battle Force* Pivot Table is shown in figure 12. The ships included here are the same as in the 5030.8A Battleforce. But the two ship classification

schemes are different. A comparison of the two systems can be found in the documentation accompanying the December 2011 ISDB update [25].

SECNAVINST 5030.8A Non-Battleforce ship count at 55

During the third quarter the Navy's Non-Battleforce fleet was unchanged. The makeup of the force from our *QuikLook_5030.8A_NonBattleForce* Pivot Table is shown in figure 13. Our data are consistent with the Navy Ship Annual Supplemental Data Tables (SASDT) of June 2012 [47] and July 2013 [48].

NVR Local Defense and Miscellaneous Support Forces at 115 ships

According to the NVR's classification scheme, ships not in the Ship Battle Forces may fall into its Local Defense and Miscellaneous Support Forces organization. The ships in these forces include the ships in the 5030.8A Non-Battleforce. They also include ships in the Ready Reserve Force, reported in MARAD's National Defense Reserve Fleet Inventory reports. Figure 14 shows the makeup of these forces from our *Quiklook_NVRLocDef&MiscSptForce* Pivot Table.
